# YOUR SMILE DESERVES THE VERY BEST

***The holidays are approaching...gift yourself  
the smile you have always wanted!***

A brighter, fuller smile radiates confidence and creates a more youthful appearance. Our patients have experienced transformational results from whitening, Invisalign® and crowns/veneers. Ask us for case examples the next time you're in the office.

Contact us today to reserve a  
***complimentary consultation*** to discuss options for your smile design.

## STEM CELL THERAPY

Stem cell therapy is a revolutionary way to promote your body's natural healing process and regenerate bone and tissue. Stonebriar Smile Design offers REJUVA DENT™ stem cell protocol which utilizes a multipotent umbilical stem cell injection into the oral vasculature to encourage self-repair and healing. A simple injection which feels similar to getting numb for a filling is all you experience. The entire procedure takes less than 10 minutes.

### Stem cell therapy has been shown to do the following:

- Decrease signs of inflammation.
- Reduce oral, head, neck, and periodontal pain.
- Lower periodontal pathogen levels.
- Promote new growth in the bone that supports teeth.
- Lower the periodontal pocket depths that manifest during periodontitis, a more advanced stage of gum disease.
- Slow down the progression of diseases.

STAY UPDATED ON THE LATEST AND FOLLOW US ON  
FACEBOOK @REJUVA DENT.

## THE END OF YEAR IS APPROACHING...

Plan for the completion of your dental  
treatment before the end of the year.

Most dental insurance plans are set up with a yearly maximum. If left unused, any remaining benefits are lost and not carried over into the new year. Flexible spending and/or health savings accounts can also be used to assist with out-of-pocket costs.

Good planning will ensure a convenient appointment  
during our busiest time of year. Call today!

## Dear Friends,

**Happy Fall!** This year has been full of many firsts. If you would have asked me a year ago if I ever thought that my business would shut down and not be able to serve patients' emergency dental needs, I would have said "never in a million years"! Well...let's just say that we are so happy to be back up and running full-steam ahead. This time has solidified the importance of preventive and proactive oral health. It truly is now more important than ever before. The highest at-risk patients are the elderly and those compromised in areas of cardiovascular, diabetes, autoimmune and pulmonary. *Sound familiar?* This is the same, exact at-risk group who have been linked to periodontal (gum) disease and dental infections. PLEASE LISTEN UP! It is never too late to put your health first, so start today friends! It is imperative to be as strong and as healthy as possible during this unprecedented time. Stay connected to the recent podcast releases on SymplifiHealth™ and hear our suggestions!

Additionally, stem cells are a preventative option for at-risk patients. The same inflammatory cascade response also settles down with stem cell injections. To learn more give us a call. We are pre-scheduling injections the last Tuesday of every month.

**Covid-19 created many changes for most of us.** At the office we have had some bitter-sweet moments. We said goodbye to our hygienists Hollie, Lynette and Aurelia, as well as our dental assistant, Mona. We are thankful for their service to our patients and they will be greatly missed. Since then, Ody and Kelly have made a great addition to the hygiene team at Stonebriar Smile Design. I can't wait for you to meet them.

**Life is always changing!** Remember the face on the cover of the newsletter? That is my niece, Trisha, my assistant and then a hygienist for many years. She recently got married in Montana and the twins were her junior bridesmaids. The whole family had tons of fun celebrating together.

**Do you have nightguards or retainers sitting in your drawer that are not being used faithfully?** I urge you to get them out tonight. We have seen an enormous amount of breaking, chipping and tooth sensitivity from increased stress and tension. It is time to wear a device at night to protect your teeth and avoid expensive dental work in the future. Again, prevention is the name of the game.

I want to thank you all for placing your confidence in our team and facility to take care of you during these medically-trying times of the fear of exposure. Trust me, you are in a safe place. Dentistry has been dealing with germs for years and we are highly considerate of sterilization and cleanliness. This is nothing new for us!

Dr. Jill Wade & Team

## HAPPY 18 YEAR ANNIVERSARY, CHERYL!

We are thankful for Cheryl's service as a team leader and patient advocate for the past 18 years. As the head of Stonebriar Smile Design's dental hygiene department, she has set the foundation and standard of patient care for our practice to be at the forefront of progressive dentistry. We are so blessed to have her and look forward to many more years!

## WELCOME ODILETTE & KELLY!

We offer a warm welcome to our newest team members to the hygiene team of Stonebriar Smile Design.

Odilette has a profound interest in all dental aspects and wants to educate patients in the importance of maintaining excellent oral health. With 18+ years of experience, Odilette has devoted her time to creating beautiful smiles and building strong relationships with her patients.

After studying at Texas Woman's University, Kelly began a career in oral health in 2008. She has a passion for empowering each of her patients to achieve optimum oral health. She prides herself on her commitment to making sure each and every patient gets the information and attention they deserve.

**XLEAR**  
PRO-ACTIVE HEALTH

XLEAR.COM

You have heard us talk about the effective use of Xylitol for oral care through gum, mints and toothpaste. Xlear also offers a nose spray that many of us personally use and aids to clear sinus flow and protect from bacteria. Xlear sinus products use a patented xylitol solution which does both by working against bacteria and pulling moisture into the nasal cavity for a thorough cleanse. It is simple and effective, and works with your body's natural defenses to ensure optimal health.

## SymplifiHealth.com

Dr. Jill Wade and Aurelia Byrne, RDH, are committed to bridging the gap between medicine, dentistry and genetics to reveal the answers to underlying health conditions. Listen in on the podcast as they encourage you to build your own unique blue print to optimal health.
